QR GENERATOR FOR SMART ACCESS

A web/mobile-based QR code generator to create and scan QR codes for quick access to links, attendance, contact info, and payments.

Solves time delays and manual errors in data entry, file sharing, and attendance tracking.

Innovative UI with customizable codes, secure encryption, and offline generation makes it unique and user-friendly.

TECHNICAL APPROACH

- Technologies to be used

Frontend: HTML, CSS, JavaScript

Backend: Python (Flask)

Libraries: qrcode.js, pyqrcode

Tools: VS Code, GitHub

- Methodology and Process

Design simple UI

Build QR generation & scanning logic

Integrate frontend with backend

Test and deploy working prototype

FEASIBILITY AND VIABILITY

- Feasibility Analysis

Technically easy to implement using lightweight tools

Can be completed within a short timeframe

- Potential Challenges & Risks

Limited offline scanning support

Security concerns with malicious links

- Strategies to Overcome

Enable local storage for offline use

Add URL validation and encryption feature

IMPACT AND BENEFITS

BENIFITS

- Instant access
- Convenient data sharing
- Cost efficient
- Trackable analytics
- Consumes less /low data
- Provides security

IMPACT

- Technological impact
- Internet dependency
- Static QR codes are inflexible
- Limited asthetic appeal

Your
Team Name

RESEARCH AND REFERENCES

- Using openai tools like chatgpt,gemini

FUTURE ENHANCEMENTS

- AI integrated QR code generation
- Enhanced security features
- Better design customisation
- Voice over support

CONCLUSION & THANK YOU

A QR code generator is a tool that creates Quick Response (QR) codes, which are machine-readable 2D barcodes that store data such as URLs, text, contact information, or event details. Users can input the desired data into the generator, which then produces a QR code image. The code can be scanned by a smartphone or QR code reader to retrieve the stored information quickly. QR code generators are widely used for marketing, product labeling, event invitations, and other applications where easy access to information is required.

THANKS GIVING

Thank you for all the opportunities especially to the student coordinator and management

IMPORTANT INSTRUCTIONS

- Please ensure below pointers are met while submitting the Idea PPT:

1. Kindly keep the maximum slides limit up to six (9). (Including the title slide)
2. Try to avoid paragraphs and post your idea in points / diagrams / Infographics / pictures.
3. Keep your explanation precise and easy to understand.
4. Idea should be unique and novel.
5. You can only use provided template for making the PPT without changing the idea details pointers (mentioned in previous slides).
